

# HARKNESS HEIGHTS CONSERVATION OVERLAY

---

TOWN HALL PROPOSAL

*Amanda P. Sandoval*  
COUNCILWOMAN DISTRICT 1

# Overview

---

1. Background
2. Latest Version
  1. Bulk Plane
  2. Design elements
3. Next Steps
4. Q&A Discussion

# BACKGROUND

---

- Pel-Ona draft reviewed in May
- Back-and-forth with CPD, recommendations, modeling, and revisions
- July handoff to CW Sandoval
- August Task Force meeting
- Four team meetings, two CPD meetings
- December Task Force meeting

# OUR DIRECTIVE

- Do modeling and further testing where indicated
- Get further feedback from the community
- Explore unintended consequences
- Refine definitions/standards

## Harkness Heights Conservation Overlay Proposal

### Core CPD Team-HH Team Discussion Tracking

This document is a compilation of the feedback from the core Community Planning and Development (CPD) - Planning Services project team (Abe Barge, Brad Johnson, Libbie Adams) on the overlay proposal document: *A Preservation Overlay Zoning District Proposal for Harkness Heights* (dated February 21, 2019) to the Harkness Heights Team (HH Team). Hereafter this document is referred to as the "overlay proposal." This document contains the core CPD team's preliminary feedback on the overlay proposal as provided on 05.29.19. Pel-Ona's responses to CPD's comments added on 06.05.19 are represented in **blue**. Finally, CPD's comments and notes following the 06.06.19 meeting are represented in **pink**.

Comments and questions are provided for a series of design topics in the overlay proposal. Note that in some cases a single topic or proposed tool identified in the overlay proposal is separated into multiple sub-topics for organizational purposes. For each item, the core CPD team has updated the document based on the 06.06.19 meeting with symbols indicating next steps. See below:

	HH Team and core CPD team are in agreement and no further discussion is needed at this time.
	No major issues with proposal, but HH Team indicated a desire to model/test the proposed regulation and report back to CPD on final direction.
	Consensus has not been reached and more discussion may be required. HH Team to respond to core CPD team's comments, unless otherwise stated.

As a reminder, CPD's initial response is color coded as follows:

- **Initial CPD Response: Support.** The core Planning Services team did not identify any glaring challenges with implementing the proposed standard based on preliminary review.
- **Initial CPD Response: Support with Some Concerns.** The core Planning Services team did not identify any glaring challenges with the intent or general approach, but we have questions or suggestions about how the proposal could be modified to enhance ease of administration or consistency with existing Denver Zoning Code provisions.
- **Initial CPD Response: Suggest removal from design overlay proposal.** The core Planning Services team has reviewed the proposed approach or standard and identified significant challenges or alternative

Harkness Heights Overlay Proposal – Core Planning Services Team Comments and Questions (05.09.2019)

(Amended 06.05.19 to add Pel-Ona Comments; Amended 07.16.19 to reflect 06.06.19 worksession)

## BULK PLANE

- Height
- Side Setbacks
- Low-slope roof setback
- Exceptions

● ● ● ● Bulk Plane – Quick Overview

# ●●●● Bulk Plane – Quick Overview

# ●●●● Bulk Plane – Quick Overview

# ●●●● Current Bulk Plane

	Front zone (front 65%)	Rear zone (Rear 35%)
Height in stories	2.5 stories	1 story
Height in feet	30'	17'
Start of bulk plane 45* angle	17'	10'
Side setback	3' minimum, total of 10'	
Front Setback	20' or Block Sensitive	
Rear setback	12' minimum from alley	
Lot coverage	37.5% max	

No hard cap on square footage

# Current Bulk Plane

	Front zone (front 65%)	Rear zone (Rear 35%)
Height in stories	2.5 stories	1 story
Height in feet	30'	17'
Start of bulk plane 45* angle	17'	10'
Side setback	3' minimum, total of 10'	
Front Setback	20' or Block Sensitive	
Rear setback	12' minimum from alley	
Lot coverage	37.5% max	

No hard cap on square footage

Lot coverage	37.5% max	
No hard cap on square footage		

●●●● Current Bulk Plane...

● ● ● ● ...Proposed Bulk Plane

# Proposed Bulk Plane

	Front zone (40%)	Middle zone (25%)	Rear zone (35%)
Height in stories	1.5 stories	2 story	1 story
Height in feet	Low-slope roof: 25' Pitched roof: 28'		17'
Start of bulk plane 45* angle	14'		10'
Side setback	5' minimum, total of 15' For lots 45' wide or less: 3' min, total of 10'		
Front Setback	20' or Block Sensitive		
Rear setback	12' minimum from alley		
Lot coverage	37.5% max		

Maximum building size (excluding basement and garage):  
3000 square feet

# Proposed Bulk Plane

Figure 13.1-5

	Front zone (40%)	Middle zone (25%)	Rear zone (35%)
Height in stories	1.5 stories	2 story	1 story
Height in feet	Low-slope roof: 25' Pitched roof: 28'		17'
Start of bulk plane 45* angle	14'		10'
Side setback	5' minimum, total of 15' For lots 45' wide or less: 3' min, total of 10'		
Front Setback	20' or Block Sensitive		
Rear setback	12' minimum from alley		
Lot coverage	37.5% max		

Maximum building size (excluding basement and garage):  
3000 square feet

# Proposed Bulk Plane

	Front zone (40%)	Middle zone (25%)	Rear zone (35%)
Height in stories	1.5 stories	2 story	1 story
Height in feet	Low-slope roof: 25' Pitched roof: 28'		17'
Start of bulk plane 45* angle	14'		10'
Side setback	5' minimum, total of 15' For lots 45' wide or less: 3' min, total of 10'		
Front Setback	20' or Block Sensitive		
Rear setback	12' minimum from alley		
Lot coverage	37.5% max		

Maximum building size (excluding basement and garage):  
3000 square feet

# Proposed Bulk Plane

	Front zone (40%)	Middle zone (25%)	Rear zone (35%)
Height in stories	1.5 stories	2 story	1 story
Height in feet	Low-slope roof: 25' Pitched roof: 28'		17'
Start of bulk plane 45* angle	14'		10'
Side setback	5' minimum, total of 15' For lots 45' wide or less: 3' min, total of 10'		
Front Setback	20' or Block Sensitive		
Rear setback	12' minimum from alley		
Lot coverage	37.5% max		

Maximum building size (excluding basement and garage):  
3000 square feet

# ●●●● Low Slope Roof Rules

- From discussions with small team
- Desire to follow Potter Highlands example to encourage peaked roof forms.
- Concern that original proposal accidentally encourages flatter roofs.

# Proposed Bulk Plane

	Front zone (40%)	Middle zone (25%)	Rear zone (35%)
Height in stories	1.5 stories	2 story	1 story
Height in feet	Low-slope roof: 25' Pitched roof: 28'		17'
Start of bulk plane 45* angle	14'		10'
Side setback	5' minimum, total of 15' For lots 45' wide or less: 3' min, total of 10'		
Front Setback	20' or Block Sensitive		
Rear setback	12' minimum from alley		
Lot coverage	37.5% max		

Maximum building size (excluding basement and garage):  
3000 square feet

# Proposed Bulk Plane

	Front zone (40%)	Middle zone (25%)	Rear zone (35%)
Height in stories	1.5 stories	2 story	1 story
Height in feet	Low-slope roof: 25' Pitched roof: 28'		17'
Start of bulk plane 45* angle	14'		10'
Side setback	5' minimum, total of 15' For lots 45' wide or less: 3' min, total of 10'		
Front Setback	20' or Block Sensitive		
Rear setback	12' minimum from alley		
Lot coverage	37.5% max		

Maximum building size (excluding basement and garage):  
3000 square feet

Height in stories	1.5 stories	2 story	1 story
Height in feet	Low-slope roof: 25' Pitched roof: 28'		17'
Start of bulk plane 45* angle	14'		10'
Side setback	5' minimum, total of 15' For lots 45' wide or less: 3' min, total of 10'		
Front Setback	20' or Block Sensitive		
Rear setback	12' minimum from alley		
Lot coverage	37.5% max		

Maximum building size (excluding basement and garage):  
3000 square feet

# ●●●● Bulk Plane Exceptions

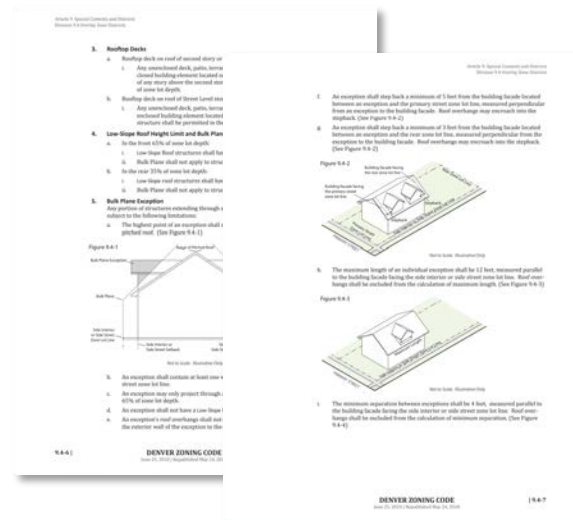

Figure 15: The above image shows how the dormers encroach into the bulk plane

## Encroachments

Now using precedent from Potter Highlands overlay

- Simple, easy, has same effect of allowing dormers and similar traditional architecture

# ●●●● Bulk Plane Exceptions

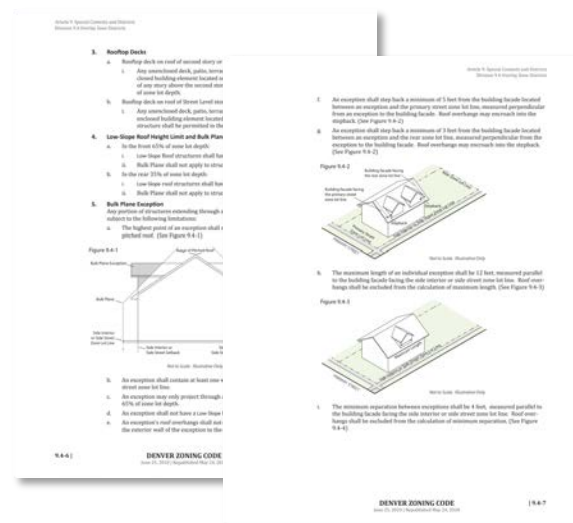

Figure 15: The above image shows how the dormers encroach into the bulk plane

## Encroachments

Now using precedent from Potter Highlands overlay

- Simple, easy, has same effect of allowing dormers and similar traditional architecture

# ●●●● Low-Slope Roof Stepback

1. Prevents “caboose” form.
2. Based on existing rule for low-sloped roofs above 25 ft.

# ●●●● Low-Slope Roof Stepback

1. Prevents “caboose” form.
2. Based on existing rule for low-sloped roofs above 25 ft.

●●●● Low-Slope Roof Stepback

No stepback

With stepback

## DESIGN ELEMENTS

- Rooftop Decks
- Porch dimensions
- First floor elevation

CONSIDERED ALTERNATIVES ROOFTOP DECKS

DRAFT RECOMMENDATION  
RE: ROOFTOP DECKS

CONSIDERED ALTERNATIVE A  
**REJECTED**

CONSIDERED ALTERNATIVE B  
**REJECTED**

Currently:

Considered revision:

Considered revision:

Any unenclosed deck, patio, terrace, porch, exterior balcony, or similar unenclosed building element located on the roof of the first, second, or third story of a structure shall be prohibited.

Any unenclosed deck, patio, terrace, porch, exterior balcony, or similar unenclosed building element located on the roof of the first, second, or third story or on the roof of any story above the second story of a structure is permitted only in such instance where views to rear 50% lot depth and first-floor side walls are invisible.

Any unenclosed deck, patio, terrace, porch, exterior balcony, or similar unenclosed building element located on the roof of the first, second, or third story or on the roof of any story above the second story of a structure is permitted only along front-most wall of upper half-story.

# Rooftop Decks

- CPD had asked team to consider any allowable forms.
- Conclusion: **No decks above the first story, anywhere**

## Porches: Definition

- Definition exists in code, but is vague and minimal.
- Pergolas can count.
- No enclosure needed.

## Porches: Definition

- Definition exists in code, but is vague and minimal.
- Pergolas can count.
- No enclosure
- Goal for new standard:
  - Break up mass of building
  - Create neighborly interactions

## Porches: Definition

- All buildings must have a covered porch with a min. area = 120 sf;
- The porch must protrude from the front of the building by min 8’;
- The porch must have a low wall or railing;
- Qualifying area may not be recessed under livable space above;
- Qualifying porches may occur along Side Streets if building is on a corner.

# ●●●● Porches Required

- Porch is covered
- Porch has side walls
- Porch is elevated between 1' to 3'
- Porch protrudes from house
- 120 s.f. is not recessed under livable space

## First Floor Elevation

### Simplified standard:

- Porch and elevation of first floor finished floor will use the same range limits:
  - Must be minimum 12" tall and maximum 36".
- Continues pattern of “base-middle-top” along street.
- Creates more livable basements.

# First Floor Elevation

Bulk Plane

Design Elements

# NEXT STEPS

---

- Town Hall meetings and community feedback
- Final draft submittal
- CPD moves forward with technical edits
- Public Hearings:
  - Planning Board
  - Land Use Committee
  - Full Council 1 & 2

# DISCUSSION

*Amanda P. Sandoval*
